

Corporate Digital Signage Comparison Guide

Vibe.fyi vs ONELAN

About Vibe.fyi

Digital signage software for Workplace Communication

Improve employee communication in the workplace via digital signage screens, screensavers and web browsers, and mobile devices. Empower communication teams to breathe life into stagnant messaging to capture attention and influence behaviour by transforming top-down employee communications into bite-sized visual messages.

Vibe initially began as an enterprise-level website CMS at the peak of the dot-com era in 2001. Since 2020, Vibe has been focused on helping internal communication specialists connect and engage with their workforce using digital signage screens.

Why choose Vibe?

Expand employee communication beyond digital signage

With our multichannel approach, you can reach your team through screensavers, web browsers, and mobile devices – whether they're in the office or working from home. This means you can easily share engaging and impactful messages throughout your organisation, all in one efficient and effective platform.

Unlike ONELAN, no extra server hardware or media player devices are required, removing unnecessary costs and infrastructure for your digital signage needs.

Extensive template library with built-in optimisation

Never struggle with creating engaging content again

With Vibe's extensive template library, create professional animated content in minutes, without stretching yourself thin. Spend less time formatting slides and more time crafting high-value messages that will keep your workforce engaged!

Deliver engaging messages to promote long-term message retention and recall

More than just built-in animation and high-impact visuals, all slides use Vibe's signature Snackable Learning Framework[®]. This leverages spaced repetition to keep messages fresh and boost long-term retention to deliver an optimised learning experience.

Set corporate branding themes

Customise your Vibe slides with your brand's font, colours and imagery, which are automatically pre-set, even if you have multiple brands within your organisation

Set and forget functionality

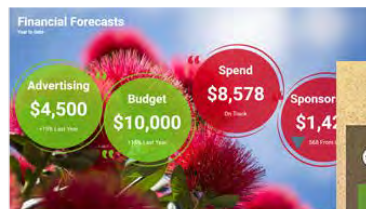

Our slides enable you to pre-load multiple messages at a time, set individual publishing rules, define content locations and then let Vibe take care of the rest.

Swap between slide templates

Quickly change templates without losing your content. Vibe automatically transfers your messages to the new template in seconds.

Integrations

Vibe integrates with leading workplace solutions and social media apps, check out our [full list of integrations](#).

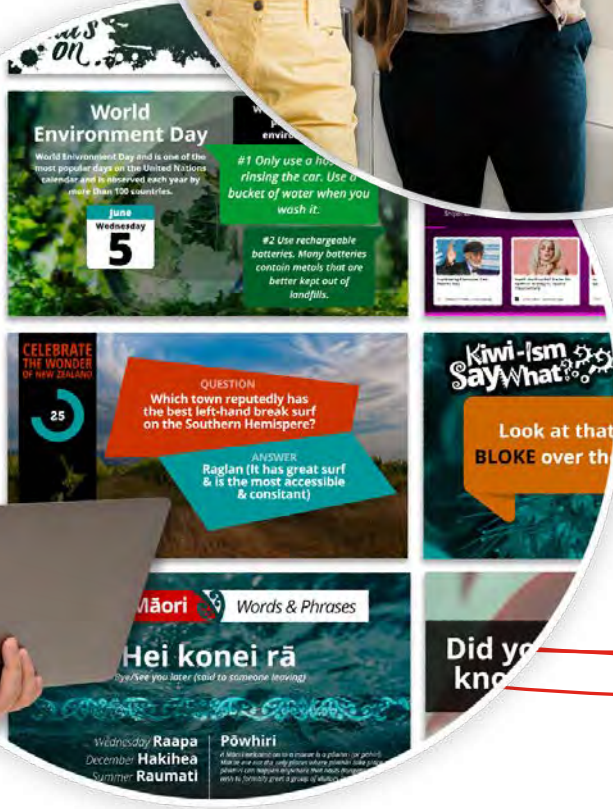

Plug and play programs ready in minutes

Elevate your workforce with Vibe's expertly crafted development programs in cybersecurity, wellbeing, culture, diversity & Inclusion and more.

Using our Snackable Learning Framework© and nudge learning strategies, these programs create lasting behaviour change and outcomes. Fully managed and ready to go.

Talk to us about customising them to meet your specific business needs.

Out-the-box infotainment streams

Relevant, entertaining and useful content is the secret to keeping your staff engaged during their down time. Skip the hassle of creating and managing infotainment content with Vibe's ready-to-go options.

Cloud-based digital signage at its finest

Vibe's digital signage software is hosted on Microsoft Azure Cloud services, giving you the ability to create and manage screen content for multiple regions and screens from anywhere. For our enterprise clients, we offer the option of an Azure Private Cloud or on-premises deployment, providing even more flexibility and control.

Reduce hardware and costs

Cut the cost and hassle of physical media players with Vibe. Our software works seamlessly and reliably on System on Chip technology, without limiting any of our extensive functionality.

Enjoy the full Vibe experience while saving money and increasing security and reliability.

Stay connected on-the-go

Vibe empowers communication teams with the flexibility to create and manage content remotely. Our mobile-responsive solution enables you to access Vibe's features and functions on-the-go, so you can create, edit, publish and manage slides, ticker bars and playlists from the palm of your hand.
